

MLC YACHTING

MLC YACHTING MONACO

ENGINEERED EXPERTISE. INDEPENDENT ADVICE

INDEPENDENT TECHNICAL CONSULTANCY · MONACO

Planned Maintenance System solutions

Consultancy · Gap Analysis · Optimisation · Implementation

Independent PMS expertise for the yachting industry. MLC Yachting Monaco provides technical consultancy for the review, development and implementation of yacht Planned Maintenance Systems across multiple software platforms.

REVIEW
what you have.

IDENTIFY
what you need.

IMPLEMENT
the right solution.

OUR OBJECTIVE IS SIMPLE

A solid, reliable and practical PMS built around the yacht and its operational requirements.

Marco Lo Cicero · marco@mlcyachting.com · +33 (0) 7 81 88 70 64 · mlcyachting.com

INDEPENDENT CONSULTANCY

The right PMS starts with the yacht

A Planned Maintenance System is more than software. It must accurately reflect the yacht's equipment, maintenance requirements, operational profile, applicable Class and Flag requirements, and the way the crew works onboard.

MLC Yachting Monaco approaches every project from the client requirement first. We can review and improve an existing system, restructure selected areas, support migration, or implement a new PMS using the software platform best suited to the project.

PMS GAP ANALYSIS

Independent review of an existing PMS to identify missing, incomplete or ineffective areas.

PMS OPTIMISATION

Improve equipment structures, maintenance schedules, records and workflows without automatically replacing the existing system.

MULTI-PLATFORM IMPLEMENTATION

Technical PMS development and implementation across multiple software solutions, according to the yacht and client requirements.

RELIABLE TECHNICAL CONTENT

Build the PMS around vessel documentation, manufacturer recommendations and relevant operational requirements.

INDEPENDENT BY DESIGN

We don't sell software. We recommend and build whatever worlds best for the yacht - and where an existing PMS already provides a suitable foundation, the priority can be to strengthen it rather than replace it.

START WITH WHAT IS ALREADY ONBOARD

PMS Gap Analysis & Review

Before recommending a new implementation, MLC Yachting Monaco can perform a structured Gap Analysis and review of the PMS already in use. The purpose is to determine whether the current system is complete, reliable, maintainable and practical for the crew.

THE REVIEW CAN COVER

- ✓ Equipment hierarchy, component identification and database completeness
- ✓ Maintenance tasks, intervals and manufacturer recommendations
- ✓ Maintenance history, records and traceability
- ✓ Class / Flag survey-related tasks and supporting documentation, where applicable
- ✓ Yacht and crew certification structures and expiry control
- ✓ Safety-related tasks, inspections and drills
- ✓ Usability, responsibilities, workflow and day-to-day administration

FOLLOWING THE REVIEW, A PRACTICAL IMPROVEMENT PLAN

1. **OPTIMISE**
2. **RESTRUCTURE**
3. **MIGRATE**
4. **IMPLEMENT**

DRIVEN BY YOUR NEEDS

Every recommendation is based on the condition of the existing PMS and the client's operational needs.

FROM TECHNICAL CONTENT TO ONBOARD USE

A complete PMS service across multiple platforms

MLC Yachting Monaco can provide the same core PMS consultancy and development service using multiple PMS software solutions. The software is the platform; the value of the implementation lies in the quality of the technical structure, data, maintenance logic and onboard usability.

MAINTENANCE	Equipment databases, planned maintenance tasks, inspections, manufacturer schedules, survey-related items and drydock planning.
YACHT CERTIFICATION	Structured control of yacht certificates for private or commercial operation, according to the project scope.
CREW CERTIFICATION	Crew certificate structures aligned with the yacht's manning arrangement and departmental organisation.
SAFETY / SMS	Safety tasks, drills, inspections and, where included in the project scope, integration with safety management documentation.
IMPLEMENTATION SUPPORT	Consultancy on structure and organisation, final customisation with the crew, and a system configured around responsibilities onboard.

BUILT ON EXPERIENCE

Yacht-specific maintenance, certification, crewing and safety structures are already developed - drawn from hands-on implementation and technical documentation.

ACCELERATED DEPLOYMENT

Marad: a yachting-ready implementation option

Marad is one of the PMS platforms supported by MLC Yachting Monaco. Its key advantage for a new implementation is that MLC Yachting Monaco has already extensively customised the platform for yachting use and implemented the solution for multiple clients.

Instead of starting from an empty system, a new project can begin from developed yacht-specific structures and databases and then be customised to the individual vessel. This can considerably reduce implementation time while retaining vessel-specific configuration.

WHY THIS MATTERS

- Yachting-specific customisation already developed
- Proven through multiple client implementations
- Ready-to-use database structures as a starting point
- Reduced development and implementation time
- Final configuration remains tailored to the individual yacht

Marad remains a solution within the wider MLC Yachting Monaco PMS consultancy offering and not the limitation of the service.

PROJECT APPROACH

From assessment to a reliable onboard solution

1 ASSESS

Understand the yacht, the existing PMS and the client's priorities.

2 DEFINE

Identify gaps and agree whether to optimise, restructure, migrate or implement.

3 DEVELOP

Build or customise the technical structure, maintenance content and relevant modules.

4 VALIDATE

Review the configuration against available yacht documentation and operational requirements.

5 IMPLEMENT

Finalise the solution for practical onboard use with the client and crew.

FLEXIBLE MANAGEMENT

Implementation is structured around the project scope and client's requirements, on an hourly or fixed-budget basis.
