MLC YACHTING

MLC YACHTING MONACO

ENGINEERED EXPERTISE. INDEPENDENT ADVICE

INDEPENDENT TECHNICAL CONSULTANCY · MONACO

Refit project management & new build supervision

Independent technical support · Structured project preparation · Flexible project management

MLC Yachting Monaco provides independent technical representation and project-management support for yacht refits, upgrades, Class Special Surveys and new-build projects. Our involvement can start before the yard period, continue through full execution, or be introduced into an ongoing project when independent review and recovery support are required.

FROM TASK LIST TO EXECUTABLE PROJECT

A successful refit starts before the yacht enters the yard. Working with the Captain and Crew, MLC Yachting Monaco develops the preliminary phase, so the Client moves from a simple task list to a clearly defined, commercially evaluated project.

DEFINE

Work list, Yard Specifications, technical priorities, Class requirements and project scope.

COMPARE

Budget, execution timeline, tendering and like-for-like market comparison of quotations.

CONTROL

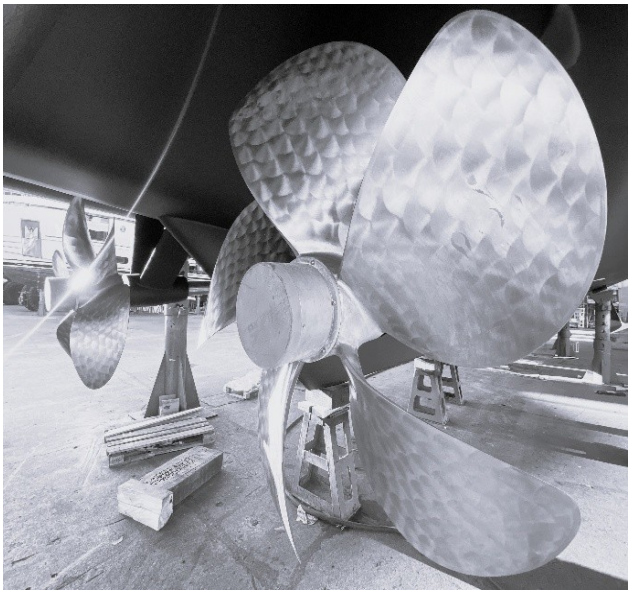

Clear execution strategy, cost baseline and schedule before commitments are made.

Once prepared and awarded, the Captain and Crew may manage day-to-day yard operations directly, with MLC Yachting Monaco remaining available when required – or MLC Yachting Monaco can continue into full on-site Project Management and supervision.

REFITS · TECHNICAL UPGRADES · CLASS SPECIAL SURVEYS

Experience where it matters

REFIT PROJECT MANAGEMENT

More than 25 years of maritime experience and a track record exceeding EUR 80M in total refit budgets bring practical, operational, technical and managerial experience to complex yacht projects.

25+

years of maritime experience

€80M+

in total refit budgets

ORGANIZATION

Scope, Yard Specifications, budget, contracts, planning and execution strategy.

COMMUNICATION

Coordination between the yacht, Captain and crew, yard, subcontractors, surveyors and other involved parties.

SUPERVISION

On-site management, technical follow-up, progress and cost control, testing, delivery and close-out.

CLASS SPECIAL SURVEYS & TECHNICAL UPGRADES

Major refits, technical upgrades and Class Special Surveys require technical scope, sequencing, fixed deadlines and cost exposure to be managed together. Class requirements can be integrated into the overall yard specification so survey items, planned maintenance, repairs, upgrades and Owner works are coordinated within one structured project.

PROJECT GAP ANALYSIS & RECOVERY SUPPORT

MLC Yachting Monaco can independently review an ongoing project where delays, cost overruns, unclear scope or execution difficulties are developing. The review can cover specifications, critical path, committed costs, variations, contracts, Class requirements, technical issues, reporting and stakeholder coordination, followed by prioritized corrective actions.

FLEXIBLE SUPPORT DURING EXECUTION

The engagement can be adapted to the project: preliminary preparation only, periodic independent support, full Project Management, or targeted assistance when technical, commercial or schedule issues require additional control.

INDEPENDENT OWNER REPRESENTATION FROM CONSTRUCTION TO DELIVERY

New build supervision & credentials

NEW BUILD SUPERVISION

MLC Yachting Monaco provides independent Owner's technical representation during new yacht construction, with the level of involvement adapted to the Client's requirements.

- Technical specification and project-requirement review.
- Regular shipyard visits, quality control and progress monitoring.
- Schedule and milestone follow-up.
- Change-order, upgrade and customization support.
- Commissioning, testing and delivery assistance.
- Support to Captain and Crew with operational preparation, Planned Maintenance, SMS and compliance requirements.

EXPERIENCE & CREDENTIALS

Founder Marco Lo Cicero's background spans Chief Engineer, Deck Officer and Captain roles, followed by DPA/CSO, Technical Management and Project Management. This combination provides practical understanding of both onboard operational requirements and shore-side project execution.

- ✓ Advanced Diploma in Marine Surveying
- ✓ DPA certification
- ✓ ISO Internal Auditor
- ✓ ISPS Internal Auditor
- ✓ Hazmat Expert and NTRVP/NPDES training
- ✓ English, French and Italian; basic Spanish

A FLEXIBLE ENGAGEMENT MODEL

MLC Yachting Monaco can structure the project and hand an organised execution package to the Captain and Crew, remain available as independent support, provide full Project Management, or step into an existing project where additional technical and commercial control is required.
